ROY QUALITY

Remembering the quality, we select textiles from renowned European suppliers – mostly natural, noble fabrics – especially 100% cotton and cotton with the addition of elastane. For summer we also offer a collection of linen shirts, blazers and trousers. Due to water resistance parameters, jackets and coats are made from polyester fabrics. We use additional improving processes such as Garment and Enzyme Wash guaranteeing comfort and convenience, long-lasting use and stability of sizes and colours.

Precise finish, refined details, such as decorative buttons and stitching, ribbons and interesting combination of linings are our trademarks.

Our clothing is produced entirely in Poland. Domestic manufacturing guarantees us quality and full control of designs implementation. We offer a wide range of sizes for all types of silhouettes.
